Seashell picture frame

1
Find a blue or turquoise wooden frame.

You can also paint a white frame with wood safe paint!

4
Use a strong glue to glue down all the shells in a whimsical pattern

2
For the worn beach look, sandpaper down the corners and some of the edges to reveal the wood or white underneath

5
Put in a photo of you and your family or friends. I bet Gramma would look great in there!

3
Lay the frame flat and arrange different size shells around it. They can poke out over the edges on the top and sides. You can also add bits of beach glass or plastic pearls
